

**STAFF REPORT FOR THE HISTORIC RESOURCES COMMISSION MEETING
OF MAY 14, 2009**

AGENDA ITEM: F-3

FILE NO: HRC-09-031

STAFF AUTHOR: Jennifer Pruitt, Principal Planner

REQUEST: To allow installation and replacement of windows on property zoned Mixed Use Residential (MUR)

APPLICANT: Sonia Taggart

OWNER: Everest Holding, LLC

LOCATION/APN: 108 N. Minnesota Street / 003-204-01

RECOMMENDED MOTION: It is recommended that the Historic Resources Commission "Move to approve HRC-09-031, a request from Sonia Taggart (property owner: Everest Holding, LLC.), to allow installation and replacement of windows, on property zoned Mixed-Use Residential (MUR), located at 108 N. Minnesota Street, APN 003-204-01, subject to the conditions of approval contained in the staff report."

RECOMMENDED CONDITIONS OF APPROVAL:

1. All development shall be substantially in accordance with the attached site development plan.
2. All on and off-site improvements shall conform to City standards and requirements.
3. The use for which this permit is approved shall commence within 12 months of the date of final approval. An extension of time must be requested in writing to the Planning Division 30 days prior to the one year expiration date. Should this request not be initiated within one year and no extension granted, the request shall become null and void.
4. The applicant must sign and return the Notice of Decision within 10 days of receipt of notification. If the Notice of Decision is not signed and returned within 10 days, then the item will be rescheduled for the next Historic Resources Commission meeting for further considerations.
5. The applicant shall submit a copy of the signed Notice of Decision and conditions of approval with the building permit application.
6. A building permit will be required for the replacement windows if the window openings result in openings that are larger than the previous window openings. Please contact the Building Division for approximate fees, plans required, number of plans to submit and general assistance in the City's Building Permit process.

DISCUSSION:

This is a one-and-a-half story vernacular structure derives its style from the Greek Revival modes. The existing office structure was built prior to 1860 by William Stewart, the first U.S. Senator from Nevada. The structure was sold to the Catholic Church in 1917 and used as a rectory. The vernacular structure is an important representative of the stone building tradition that is so much a part of Carson City's architectural heritage. It has been speculated that with most of the stone buildings in Carson City was probably from the Nevada State quarry.

Staff conducted a site visit on April 17, 2009, and documented the well manicured and amply landscaped site photographically.

The applicant is proposing to replace all windows in the structure with:

- New wood, double-hung insulated and low E glass windows. or
- New vinyl single hung, Low-e366, Argon Gas windows.

Per the information provided by the applicant, the existing windows allow drafts and cold air to enter the structure. Per the applicant, the existing windows cannot be repaired due to the age, brittleness and poor existing condition. The wide window trim will remain. The existing windows are two over two. The applicant will accept direction at the meeting from the Historic Resources Commission regarding the preferred replacement window product of the existing windows on site.

5.16 Guidelines for Windows

The majority of buildings in the Historic District are characterized by 19th century styles of architecture. Basic design characteristics of these styles are symmetrically placed, vertically proportioned windows. Houses built in the 1930's to 1960's used in addition to the above, metal framed windows such as casements and picture windows.

5.16.1 Guidelines for Historic Buildings

Original windows shall be retained and repaired when at all possible. When replacement is necessary a window of duplicated design shall be used. The size, pane configuration, design and trim shall replicate that of the original. Original trim and surrounds are to be retained when windows are replaced. Bronzed aluminum framed windows are not appropriate for use in a historic building. Stained glass windows were not commonly used in the buildings of the district. Original stained glass windows are very valuable and should be retained. The addition of stained glass windows into openings which did not historically have stained glass is discouraged. (*Standard Number: 2, 6*)

PUBLIC COMMENTS:

Public notices were mailed to 10 adjacent property owners to the subject parcel in accordance with the provisions of NRS and CCMC 18.02.045. As of May 08, 2009, no comments have been received in favor or opposed to the proposed project. Any comments that are received after this report is completed will be submitted prior to or at the Historic Resources Commission meeting, depending on their submittal date to the Planning Division.

Engineering Division comments:

- Development Engineering has no preference or objection to the request, and no recommended conditions of approval.

Building Division comments:

NOTE: These comments do not constitute a complete plan review, but are merely observations based on the information provided.

Scope of Application

Replacement of windows and sashes

General Plan Submittal

1. Door and window replacement when the opening size and location remain the same are exempt from the permit process. (*CCMC 15.05.020 Section 105.2 Building #15*)

With the recommended conditions of approval and based upon the project complying with the Secretary of the Interior's Standards and Guidelines for Rehabilitation, Carson City Historic District Guidelines, the Historic Resources Commission Policies, and that the plans as submitted are in general conformance, it is recommended that the Historic Resources Commission approve HRC-09-031 subject to the recommended conditions of approval within this staff report. Staff will encourage the HRC to assist the applicant with the selection of an appropriate window treatment for the subject site (see examples provided by the applicant).

Respectfully Submitted,

Briefly describe the work to be performed requiring HRC review and approval. In addition to the brief description of your project and proposed use, provide additional page(s) to show a more detailed summary of your project and proposal. NOTE: The Historic District Ordinance and Historic District Design Guidelines, as well as Policy Statements, are available in the Planning Division to aid applicants in preparing their plans. If necessary, attach additional sheets.

Remove existing Sash windows and replace with wood clad or vinyl windows.

Proposal 1: Double hung wood clad windows by Eagle Windows

Proposal 2: Double hung vinyl windows by Empire Pacific. All windows with 30/30 Energy Package

Removal + Replacement to be performed by Capital Glass, Inc.

Does the project require action by the Planning Commission or the Board of Supervisors? Yes No If Yes, please explain:

Will the project involve demolition or relocation of any structure within or into the Historic District? Yes No If Yes, please describe:

Reason for project: Windows are in poor condition. Large air gaps allow cold air into ~~window~~ building during winter and warm air into building during summer. Windows cannot be repaired due to age, brittleness, and poor condition.

SUPPORTING DOCUMENTATION

Each application requires 12 copies, folded to 8 1/2 x 11 inches, of quality site plan and drawings showing work to be performed on the subject project which requires HRC approval. Basically, this is any work which will affect the exterior of any structure and any modifications to the site, i.e., fences, walls, or major landscaping. The name of the person responsible for preparation of the plans and drawings shall appear on each sheet.

Attached is a Plan Checklist to aid preparation of plans and architectural drawings. It is understood that all checklist items will not be included in all projects. The list is intended to give the applicant an idea of the breadth of review by the Commission on those items which are included in the subject project. Photographs can be used for illustration and discussion, but are not acceptable as substitutes.

A Perfect Match for Your Home

EPW Upgrade Packages

Energy Star

90% of our windows with LoE meet or exceed the Government .35 U-Value to meet Energy Star Rating.

Pacific Plus

Energy and Durability together at last. This package offers a stronger double strength glass, argon filled and Duralite® spacer system on windows. On Sliding doors it comes with all the previous options and a extruded heavy duty screen and a dead latch. The Window reaches a minimum of a .30 U-value and a .35 Solar Heat Gain.

30/30 Energy Package

This is the Ultra Efficient Energy package. This package includes Duralite® spacer system, Argon gas filled IG and the ultimate performance LoE 366 glass. This package will achieve a .30 U-value and a .30 Solar Heat Gain or better.

This package will meet all the requirements for rebates as stated in the American Recovery and Reinvestment Act of 2009. It may also qualify for many public utility rebates, please check with your local utility for details.

A Perfect Match for Your Home

PRODUCTS | Windows | Painted

Accent the colors of your home and surroundings, creating a custom and beautiful look. The look adds value to your home, and the investment will last because it comes with a great warranty.

*actual color will vary

Painted windows are ideal for new construction or replacement. They cost less than traditional windows and require less maintenance. Our vinyl windows are a perfect fit for replacing colored windows because you can keep your color accent while improving efficiency.

Painting can be done on the two standard frame colors of white and almond and on any window configuration. With the exclusive 16 exterior colors and matching green and bronze grids there are endless options, so you too will find a perfect match for your home.

All of our finishes have been tested and meet or exceed ASTM and AAMA standards for coating substrate. All finishes are environmentally friendly.

Duralite™

3rd generation warm-edge technology using NO METAL

Patent No. 6,581,341

Duralite offers a new level of thermal performance to windows reducing conductivity by up to 45%. radical improvement in thermal properties is achieved by eliminating metal and replacing over 60% spacer profile with air. The patented design featuring a unique composite laminating technology the use of metal results in superior thermal and durability performance.

Test results performed by a third party have proven that Duralite offers the lowest **U-value rating** best **condensation resistance** when compared to other spacers.

Duralite is thermally the best energy-efficient insulating glass system available on the market.
