Interest Rate Risk. As a means of limiting its exposure to fair value losses arising from rising interest rates, the city's investment policy states that portfolio maturities must be structured to avoid the forced sale of securities in any but the most severe circumstances. To this end, portfolio management procedures will provide for the projection of a "minimum liquidity requirement" for the City's operating fund.

The following procedures will be applied:

- **Minimum Liquidity Requirement:** This is defined as the total cash flow needed to pay City obligations for a period of four weeks. All securities to be included in the "minimum liquidity requirement" must mature within 28 days.
- **Intermediate Market Investment:** That portion of City funds remaining after deletion of the "minimum liquidity requirement" may be invested in the intermediate market, defined herein as instruments maturing between zero and ten years.
