Mr. Guzman provided background information on the origin, development, purpose, and function of the Open Space Program. He provided additional background information on Open Space Program acquisitions to date and their associated funding mechanisms. He discussed the benefits of the Carson City lands bill. He described the subject master plan and zoning map amendments as “a continuum of things that we initiated about four years ago. It has to do precisely with the lands bill and ... development of the charrette that was the public process used to create a common vision for the management of the River lands and now ... the next step ... is to rezone and master plan the lands in accordance with the provisions of our code.”

Ms. Pruitt reviewed the agenda materials in conjunction with displayed slides. She reviewed the noticing process, as outlined in the agenda materials. She advised of having received one opposition letter, copies of which were distributed to the commissioners and staff prior to the start of the meeting. She further advised of having provided copies of Mr. Guzman’s response to the letter. She acknowledged that the subject properties were purchased three to four years ago from the original developer.

“some kind of barrier ... on the west side of that dam to keep people from crossing it.” He requested the commissioners’ “reasonable judgment” relative to the concerns outlined in the letter. He acknowledged that his property comes to the mean high water mark of the River. In response to a question, he advised that his property is not fenced. “It’s fenced along the road.” He further acknowledged that trespassers “come across from both sides. ... They jump the fence, they come across during low flow of the River, horseback riders ...” He further acknowledged that his property is posted with “No Trespassing” and “Private Property” signage. He acknowledged having read Mr. Guzman’s response. “... what he said makes sense; a lot of it makes sense.” Mr. Gregory was uncertain as to the City “not having to do an environmental impact because that is a potential Superfund site because of the mercury that is buried behind the dam ...” He reiterated the intent to ensure the commissioners’ awareness of the concerns outlined in his letter. He discussed an additional concern relative to safety and security. He expressed support for “this public land thing. This is great, but we want to make sure that it’s done right.”

Chairperson Kimbrough suggested that the majority of Mr. Gregory’s concerns need to be worked out with Open Space Program and Parks and Recreation Department staff “versus the fact that we’re changing the land designation.” Mr. Gregory expressed concern that “it would change our designation of our properties.” Mr. Plemel acknowledged Mr. Gregory’s concerns as an abutting property owner. He assured Mr. Gregory that changing the zoning designation doesn’t affect the issues outlined in Mr. Gregory’s letter. He acknowledged the need to address Mr. Gregory’s concerns, but advised that “this commission is looking at the land use. What is the proper designation on paper, really, and all the permitted uses for this but not a board that directs the management of City property and whether or not to manage access and fences and things.” Mr. Plemel acknowledged that the commission’s recommendations will be forwarded to the Board of Supervisors relative to the zoning map and the master plan. He explained that the commission’s purview is established by the Board of Supervisors and “it’s not within this commission’s scope to make recommendations regarding the management of City property. The application that is within your scope ... is what should be on the master plan map and what should be on the zoning map.” Mr. Plemel clarified that Mr. Gregory could bring his concerns to the Board of Supervisors, but requested him to understand the commission’s role relative to the subject items. Mr. Plemel advised that no environmental impact statement is required for the zoning map or master plan amendment requests. “If there ever was a project ... on the property, that might very well be the case that that would be required. And, in fact, with the public zoning designation, that means that any new use, if they plan on building a park or doing whatever improvements, requires a public process in order to do that ... at which time, then there’d be another process where you start talking about improvements that are related to that new use ...”

Chairperson Kimbrough entertained additional comments from Mr. Gregory. Mr. Gregory reiterated the concern relative to the zoning designations of his property being affected. Mr. Plemel assured him that the subject amendments will certainly not affect his property. “This is City property clearly ... and there’s no intention to affect the designation of any of the private properties surrounding it.” Discussion followed.

Chairperson Kimbrough entertained additional commissioner comments, questions, or a motion. In response to a question, Mr. Guzman advised that the property is accessed from Golden Eagle Lane on the south or from the north at a “very precarious ... metal bridge right on the dam that allows you to cross from Silver Saddle Ranch to the north all the way into the property to the south ...” He reviewed equestrian and pedestrian use of the City’s property. He described various features of the property. In response to a further question, he advised that there is no signage identifying the property as being owned by the Open Space Program. He noted that “as you are driving Golden Eagle Lane, you will find some signs indicating

that the road is private. ... The public at large has a right to use the road. We purchased that access when we bought one of those properties. However, that road is not maintained by Carson City. It's maintained by those neighbors so we agreed that they could continue to display those signs; however, ... the public has a right to use the road." In response to a comment, he advised of the intent to "limit or somehow manage the motorized use, particularly ATVs, OHVs, and motorcycles and it's much harder to do ... because right adjacent to the west is a very large area, presently managed by Open Space, ... which is for motorized use."

Chairperson Kimbrough suggested that Mr. Gregory present his concerns at the next Open Space Advisory Committee meeting relative to the Carson River management plan. In response to a question, Mr. Guzman advised that the two parcels directly north of the subject parcels are in public ownership by the Bureau of Land Management. The two parcels are among those which will be transferred to Carson City as part of the federal lands bill. Mr. Plemel responded to additional questions of clarification relative to the zoning designations of the two properties. "... these properties are a little bit unique and they do have a public designation ...". Mr. Guzman advised of discussions between Open Space Program staff and Planning Division staff with regard to management of the lands being transferred as part of the federal lands bill. "We decided that we need to wait until the dust settles before we go ahead and change the master plan designations and the zoning because it makes more sense. We're still correcting deeds and correcting descriptions and doing those kinds of things. ... probably next year, we'll bring a group of those back to you."

Chairperson Kimbrough entertained a motion. **Commissioner Wendell moved to adopt Resolution 2011-PC-4, recommending to the Board of Supervisors approval of MPA-11-130, a master plan amendment to change the land use designations of property located in the vicinity of the southeast quadrant of Carson City, as published on the agenda and presented by staff, from rural residential to open space, based on the findings contained in the staff report.
